

Where is
the World?

Summer Challenge

Four 18 year old girls who have just finished college want to book a holiday to the party island of Ibiza once their exams finish at the end of June. They want to enjoy some of Ibiza's famous nightclubs and party scene. They also enjoy sunbathing on the beach and water sports. They ideally want a long weekend from Thursday to Tuesday.

1. A summary page of the holiday with the following information:
 - **Return flights** for 4 adults from London to Ibiza.
 - **Transfers** – getting to and from the airport (at both ends)
 - **Accommodation** in San Antonio (must have a pool and fit 4 adults)
 - **Activities** – A booze cruise, waterpark trip, a night out in one of Ibiza's famous nightclubs, Paragliding.
2. A budget with the costs of flights, airport transfers, accommodation, getting around, food and all activities / entertainment.

Tip: You may want to research the costs of booking a package holiday through a tour operator such as TUI or Jet2 and compare this to booking each individual element of the holiday independently (DIY).

3. Create a daily itinerary for the holiday using the table below:

Date	Morning	Afternoon	Evening	Travel Details	Accommodation

Tip: Can you explain the choices you made for the customer in the itinerary. Think about issues like transport, accommodation, activities, facilities used, etc.

4. Create a visual mood board for the holiday to Ibiza using the example below as a model.
